Team 10 full loop · who does what

From the ITSG spec documents through rules → tests → verdict to the report. Box colour = who does the step.

AI writes · drafts, picks, finds gaps, flags doubts, explains

Code numbers and facts · expected results, compare, quote check, counts, logging

Person decides · approve, reject, sign

next step · problem found → rewrite · person rejects / disputes → back

AI · Source finder · Haiku
Pick relevant sections

Measured: found 22 of 22 answer sections
(39 picked · 17 outside our answer list)

1
Rule stage
write test criteria

↺ problem found → rewrite · max 2 times · code counts the rounds (LangGraph)

AI
Write criteria
+ link a code check

Code
Check quotes
really in the source?

AI
Find missing rules
Checker · Haiku

Person
Review rules
approve or reject

✕ rejected → start over

✓ approved → next stage

dispute at ③ signature comes back here

OUTPUT
criteria list + source + check

2
Test stage
test cases and expected results

↺ problem found → rewrite · max 2 times · code counts the rounds (LangGraph)

AI
Write test cases
Test writer · Sonnet

Code
Expected results
fixed code R1–R6

AI
Find missing tests
Checker · Haiku

Person
Review tests
approve or reject

✕ rejected → rewrite

✓ approved → next stage

dispute at ③ signature comes back here

OUTPUT
test cases + expected

takes ① approved criteria + ② test cases with expected results

3
Verdict stage
repeated for every case

runs only the checks linked to ① approved criteria · criteria without a code check are marked "person checks" in the report

Code
Read output file
from payroll software

Code
Compare
with ② expected results

file broken

Code · emergency stop
STOP → to a person

AI
Flag doubts
Double-check · Haiku

AI
Plain summary
Explainer · Haiku

Person
Sign
once for the report

Code
Report

✕ dispute → back to ② (tests) or ① (rules) · max 2 times

OUTPUT
result per case + plain summary + signature

Alongside
next to every stage

Code · harness
Run 300 test cases → score against expected results

Code · Langfuse
Log every step
