Review of payroll output: Abgabegrund 41 (Vorerkrankungsanfrage)

RUN ID	DATE
AGENTS-full-20261027-014300	2026-10-27 01:43–01:52 (run time)
SCOPE	RULES VERSION
DTA EEL – Abgabegrund 41 (DBVO)	VB EEL 13.4
PREPARED BY	STATUS
Team 10 – AI review assistant	Draft – not signed

1. Summary

`report`

CASES	CORRECT VERDICTS	CLEAN	ERRORS DETECTED
29	**29 / 29**	**11**	**18**

Finding counts over all cases: PASS 293 NOT EVALUATED 87 MISMATCH 26

Limits of this report

- **Synthetic template.** The official ITSG report form was not found, so this report uses a synthetic layout. No claim of compliance with the official form.
- **Simulated payroll output.** No payroll software was available. For each allowed case the run used the correct 41 and a copy with AU-AB-AG one day late; for each forbidden case, a 41 sent anyway.
- **No person has signed.** Every approval in this run was passed automatically by the test harness.
- **Explainer accuracy not measured.** The plain-language summaries are AI-written and were not scored.
- **Check F1 (Abgabegrund = 41) did not run in this run** because no approved criterion linked it. Fixed afterwards: F1, F4, F6 now always run (error log E-19); re-judging the same 29 cases (run `AGENTS-verdict-20261027-024151`) gives F1 in 29/29 cases and still 29/29 correct.
- "Correct" means the verdict matched the expected result that code computed in stage 2 (rules R1–R6).

2. Structure of the run file

One run of the full loop writes one JSON file, `reports/AGENTS-full-20261027-014300.json`, with seven parts. This report is drawn from that file as it is.

`report`	`test_case`	`execution`	`findings`	`robustness`	`review`	`trace`
Header: run ID, date, overall result	The situation each case tests	Values read from the payroll output file	Verdict: expected vs actual per check	Attack test with deliberately broken files	Person's sign-off	Langfuse record of every step

3. All cases

Every test case in this run. "Flagged" lists the checks that reported MISMATCH.

CASE	CATEGORY	EXPECTED	VERDICT	FLAGGED	CORRECT
T-01-ok	normal: correct output	send 41	clean	–	yes
T-01-bad	normal: AU-AB-AG one day late	send 41	detected	F5	yes

4. Verdict per check

findings

Detailed view of case **T-01-bad** (normal: AU-AB-AG one day late): detected correct. The interactive report lets the reader pick any of the 29 cases.

Situation (test_case)	normal: AU-AB-AG one day late; current AU 2026-05-04 – 2026-05-29, GKV, certified
Prior AUs (test_case)	2026-02-02 – 2026-02-20
Expected (code)	send 41
Simulated output (execution)	Abgabegrund 41, AU-AB-AG 2026-05-05, ANZAHL-AU 1

ID	CHECK	EXPECTED	ACTUAL (READ FROM THE FILE)	RESULT	SOURCE
Message field checks (F1–F7)					
F2	ANZAHL-AU = number of prior AUs to report	01	01	PASS	VB 13.4 §3.12.6 p.139
F3	Reported prior AU periods (order-independent)	02.02.2026 – 20.02.2026	02.02.2026 – 20.02.2026	PASS	VB 13.4 §3.12.7/3.12.8 p.140-141
F4	Employer sends KZ-AK-AU = 0 (Grundstellung)	0	0	PASS	VB 13.4 §3.12.4 p.138
F5	AU-AB-AG = start of the current AU	04.05.2026	05.05.2026	MISMATCH	VB 13.4 §3.12.2 p.137
F6	Employer sends AU-AB-SV = 00000000 (Grundstellung)	00000000	00000000	PASS	VB 13.4 §3.12.3 p.137
F7	Prior AUs listed most recent first	02.02.2026 – 20.02.2026	02.02.2026 – 20.02.2026	PASS	VB 13.4 §3.12.7 p.140
Rule checks (C9–C13)					
C9	41 only if current AU and >=1 prior AU are certified	true	true	PASS	SRC-CRIT; VB 13.4 §3.12 p.135
C13	No 41 for private insurance or marginal employment	GKV	GKV	PASS	VB 13.4 §3.12 p.136
C10	<= 6 months between start of current AU and end of last prior AU	<= 6 months	74 days (20.02.2026 -> 05.05.2026)	PASS	SRC-CRIT; VB 13.4 §3.12 p.135
C11	Prior AUs included only if each gap <= 6 months	1	1	PASS	SRC-CRIT; VB 13.4 §3.12 p.135
C12	Prior AUs (12 months) + current AU >= 30 days	>= 30	45 days (current 26, expected end)	PASS	SRC-CRIT; VB 13.4 §3.12 p.135; Beispiel 13.4/13.5

ID	CHECK	EXPECTED	ACTUAL (READ FROM THE FILE)	RESULT	SOURCE
Approved criteria without a code check					
R-12	Der Arbeitgeber muss jede Vorerkrankungsanfrage vor dem Versand individuell auf Sinnhaftigkeit prüfen.	-	`no code check for this criterion`	NOT EVALUATED no code check: a person checks this criterion	VB/3.12.md
R-13	Die Vorerkrankungsanfrage wird bei gesetzlich krankenversicherten Arbeitnehmern unabhängig vom Grund der Abwesenheit gestellt. Sie geht an die für die aktuelle Abwesenheit zuständige gesetzliche Krankenkasse.	-	`no code check for this criterion`	NOT EVALUATED no code check: a person checks this criterion	VB/3.12.md
R-15	Liegt nach einer Zwischennachricht der Krankenkasse (Kennzeichen 4) innerhalb von 8 Wochen nach Eingang der Anfrage kein AU-Nachweis bei der Krankenkasse ein und ist weiterhin eine Klärung erforderlich, muss der Arbeitgeber den Zeitraum neu anfragen.	-	`no code check for this criterion`	NOT EVALUATED no code check: a person checks this criterion	VB/3.12.4.md

> **Explainer AI** (plain summary, accuracy not measured): The start date of the current sick leave (F5) failed: the record shows 05.05.2026 but 04.05.2026 was expected, so check the date and correct it before sending. Three rules (R-12, R-13, R-15) could not be checked automatically and need manual review: confirm the inquiry is justified, that it goes to the statutory health insurer responsible for the current absence, and whether the period must be re-queried after an interim notice with no proof received within 8 weeks. All other checks passed.
>
> **Double-check AI:** no flag

5. Robustness `robustness`

NOT EVALUATED The attack test (deliberately broken files) was not part of this run. Broken files are handled separately: code stops and sends them to a person (BLOCKED, never PASS).

6. Sign-off

review

CASE VERDICT (G5)	AT
approve by auto-approved (harness)	2026-10-27T01:49:49
WHOLE REPORT	PERSON
approve by auto-approved (harness)	(empty)

In this run every approval was passed automatically by the test harness. No person has signed yet.

Name (reviewer)	Date	Signature

7. Trace

trace

Langfuse session `AGENTS-full-20261027-014300`: one record per AI call, per approval and per case verdict. Reports and Langfuse use the same run ID.

8. Terminal view

The selected case as a plain table, in the style of `run_review.py`.
